

Thorsten Simon is consultant pediatric oncologist at the University of Cologne. He is the clinical director of the Department of Pediatric Oncology and Hematology since 2014. Thorsten Simon started his scientific carrier in the GPOH neuroblastoma trial group where he was involved in the conduction and data analyses of the GPOH neuroblastoma trials NB97 and NB2004/NB2004-HR. These activities resulted in several publications on neuroblastoma. Currently he is the principal investigator of the German neuroblastoma registry NB2016. Since 2014, he is also active in the HR NBL 2.0/SIOPEN protocol-writing group.
